## Leland Place Condominiums

631 Markets St., Kirkland, WA

Located in a quiet historic corner of Kirkland, Leland Place condominiums is located on a corner across from three 1891 buildings. The project contains twenty five luxury units, commercial space and two levels of below grade parking. Designed to respect the adjacent structures to the east, the west façade opens up dramatically to the views of Lake Washington. The spacious interiors allow for entertaining opportunities and the private decks create a connection to the landscaped exterior. This project was completed while employed at Hewitt Architects. My role was Project Manager on this project.
