## Nickerson Condo Remodel Seattle, WA

Located near the Ballard Bridge in Seattle, the remodel was done to update and refine the interior of a 1980's condo. The material selection was done to create the illusion of a larger continuous space. The built in cabinets along the living room wall provide storage and seating for the owner. The bar closes off when not in use, but opens up completely for entertaining. The finishes are simple, yet elegant allowing for the owner's art work and furnishing to bring excitement to the space.
